

## Kaiser Permanente SPD Remodel

Architects Mosher Drew is currently providing complete architectural services for the remodel of the existing Sterile Processing Department at Zion Medical Center. The project refurbishes the decontamination, sterile processing, and sterile storage rooms. Existing washer disinfectors, cart washer, sterilizers and other supporting equipment are being replaced. In addition a new steam line, and new ceilings are being installed conforming to the NPC-3 requirements under SB 1953.

This technically complex renovation and equipment upgrade is being completed in three phases. The phasing was carefully constructed to keep the Sterile Processing Department operational during the construction process.
